CNA Pro News

Tailoring insurance products to meet the needs of particular market segments creates more relevant coverage and makes it easier for producers to do business with clients in those segments. Those are two primary reasons why CNA customized Epack Extra specifically for Community Banks.

As you may know, CNA recently introduced Epack Extra which expanded and simplified coverage for customers needing Management Liability, Professional Liability and Crime. And now Epack Extra is available in a customized form for Community Banks. Individual coverages in the three areas can be purchased either standalone or in various combinations, and discounts are applied for multiple coverages.

In addition to including the Management Liability coverages - EPL, D&O and Fiduciary Liability - Epack Extra for Community Banks offers the following Professional Liability and Crime/Fidelity coverages:

Bankers Professional Liability, which covers wrongful acts committed in the conduct of professional services by or on behalf of the Community Bank. This coverage can be expanded to include Lender Liability and Trust Services Coverage with separate limits.

Network Security Liability covers losses for wrongful acts resulting in Denial of Service Access, Failure of a Third Party System, or damage to Electronic Information. It also covers Content Injury or Privacy Injury resulting from those causes.

Financial Institutions Bond provides various protections for a broad array of property loss due to robbery, theft, misplacement, or destruction, whether on premises or in transit. It also covers loss due to forgery or alteration, counterfeit currency or fraudulent mortgages, or loss of records.

More information about these and other Community Bank coverages, as well as forms and applications, can be found [here](#) or by contacting your local underwriter.
