CNA Pro News

In addition to offering a wide range of coverages that meet the needs of the marketplace, we've found another key success factor is being "easy to do business with" and that means providing information that producers can quickly understand and are able to share with their clients.

Those were some of the primary reasons why we developed **CNA Pro Talking PowerPoints** – a series of multi media presentations that combine an audio portion with a traditional slide format so you can listen as well as see the material. Each presentation provides a summary which takes 10 minutes or less to view.

The initial series of Talking PowerPoints includes the following topics:

- Epack EZ
- Crime Pack
- Directors and Officers - Commercial Accounts
- Diversified Commercial Products
- Network Privacy and Security - Commercial Accounts
- Risk Control - EPL

You can find each of these in the associated product section of our website as well as in the Library tab, <http://www.cnapro.com/html/library.html> just below the list of CNA Pro News. Since the material is on the web it's available 24/7, and you can use the materials in meetings with clients and prospects, or direct them to view the content at their convenience.
