

### For a Wide Variety of Technology Companies, CNA is the Smart Choice for Coverage

CNA writes a range of industries, including: Telecommunications/Cable, Information Technology and Internet Services, Electronic Machinery and Equipment Manufacturing, and Instruments Manufacturing. CNA considers not just what the company does but also who it does the work for, allowing us to write a broader range of businesses than most other carriers in the marketplace. Our team of industry experts provides customized protection to meet your clients' varying needs in different industries.

### For telecommunications/cable companies who sell or resell local, long distance, paging, data services, Internet bandwidth, Internet services and cellular services or equipment

#### We insure:

- Communications lines/bandwidth services
- Companies that consult, design or recommend telecommunications networks
- Data services
- Information security monitoring services
- Internet access providers, including e-mail services
- Sellers and resellers of local, long distance, paging and cellular services
- Sellers or suppliers of telecommunications equipment
- Telephone companies
- Video conferencing service providers
- Wireless service companies

### For companies that offer programming, data processing, consulting and Internet-related services, as well as software manufacturing

#### We insure:

- Computer maintenance or repair
- Computer processing and data preparation
- Custom programmers, software manufacturers, system integrators and providers of computer consulting and other computer-related services
- Internet access and service providers
- Managers of computer facilities
- Providers of Web hosting and Web design services

### For any company who manufactures products that are used to process or display data, including component parts of those systems

#### We insure:

- Manufacturers of computer chips, wiring, harnesses, cables, electronic connectors, resistors, capacitors and other component parts
- Manufacturers of computers and peripheral equipment such as printers, computer storage devices, display devices, document entry, optical scanning, point-of-sale devices and office machines
- Manufacturers of industrial machinery equipment that is software driven
- Telecommunications and broadcasting equipment manufacturers

### For companies who manufacture instruments that are controlled electronically and used to measure variables such as temperature, density, pressure and flow

#### We insure:

- Manufacturers of instruments used for measuring, displaying, transmitting and controlling the manufacturing process
- Manufacturers of laboratory instruments used in research and development labs
